

NIKKO CHEMICALS received the **BRONZE Award** at in-cosmetics Asia

NIKKO CHEMICALS received the BRONZE Best New Functional Ingredient Award*1 for “NIKKOL NIKKOFINE LW ” at in-cosmetics Asia 2015!

*1 The awards are given to honour the development of novel ingredients that combine innovative science and products features in a way that demonstrates substantial benefits to manufacturers and end-users when compared to existing ingredients.

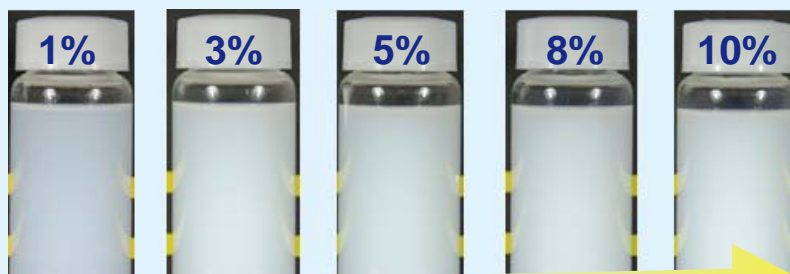

Awards will be split into Functional Ingredients and Active Ingredients and there will be a Gold, Silver and Bronze Award for each of these two categories.

NIKKOL NIKKOFINE LW

NIKKOL NIKKOFINE LW provides immediate hydrating effect, unique texture and luxurious “lucent white” appearance. Based on NikkoChemicals’ PIT technology, it helps formulators to create nano-emulsions with particle size of less than 100 nm by simple addition of water, without the use of high-energy processing. Such nano-emulsions have premium “lucent white” signature appearance, which conveys the message of luxury to consumers.

“Lucent White” look: the emulsion does not look cloudy white, but it is slightly bluish and revealing translucency.
