

# NIKKOL GROUP NIKKO CHEMICALS received the SILVER Best Sensory Bar Award for Meguri Series at in-cosmetics PARIS 2016!

**Meguri Series** - MEGURI is a Japanese word that means "circulation", "go round". It sometimes denotes a "chance encounter". Our formulations symbolize these different meanings. These formulas share two important features: "dynamic textures" that evolve and change during application, and beautiful visual appearance, that we tried to emphasize by

designer photographing.

Long-playing & luxurious, these textures highlight the importance of massage in the East Asian regimen where stimulating blood circulation and softening facial muscles helps to improve skin tone and firmness. These formulas show how circulatory strokes can be incorporated in either the cleansing or treatment step.
